

UPENDRA GUPTA

Professional Summary

Experienced Software Engineer with 3+ years specializing in C & Linux, currently contributing to 5G RAN CBRS module development at Capgemini (Gurugram). Skilled in debugging, automation, and feature integration with a strong focus on performance optimization and CI/CD pipelines.

Skills

- Programming: C, Data Structures & Algorithms, Shell Scripting
- Tools: Wireshark, Git, GDB, Jenkins, CI/CD, Vim
- Technologies: Linux, Core/Thread mapping, AI-based Code Refactoring
- Telecom: 5G Architecture, 3GPP, CBRS, NR-POS, gNB, Layer2, CU - DU Split, SA, TDD, NG Interfaces, Call Flow

Work Experience

Software Engineer (Professional 1) | Capgemini (formerly Altran) | Gurugram | Aug 2022 – Present

- Collaborated with global cross-functional teams to deliver patches and features, reducing release-cycle issues by 15% while maintaining code quality standards, with C language.
- Debugged complex 5G RAN issues using GDB, log analysis, and Wireshark, improving stability and reducing recurring defects by 25%.
- Integrated, deployed and aligned CFGs for CBRS and NR-POS features for US and European customers, supporting 100% successful feature rollout across customer environments.
- Utilized Git for version control and release management, improving collaborative development efficiency by 20% through streamlined branching and CI/CD integration.
- Made a tool to Automate build, test, and deployment pipelines on Linux systems, improving developer productivity by 30% and significantly reducing manual intervention.
- Configured and managed end to end Linux servers, including OS installation, thread/core mapping, system bring-up, and configuring CFGs improving performance and reliability by 20%.

Projects

- **CBRS O1 feature:** Integrated **CBRS & O1 features** in C, performing end-to-end client-side testing, reducing manual CFG alignment and aligning with U.S. regulatory framework.
- **NR Positioning:** Integrated 5G **NR positioning** feature, deployed at customer sites to enable precise location-based services.
- **Server Bring-up:** Engineered **zero-touch server bring-up** and E2E test framework using C and Bash scripting, reducing manual effort by 90%.

Education

COURSE	COLLEGE	YEAR	MARKS	LOCATION
B.E (CSE)	Visvesvaraya Technological University	2018-2022	8 CGPA	BANGALORE
12 th (PCM)	AYT Sr. Sec School	2016-2018	7.5 CGPA	UTTAR-PRADESH
10 th (PCMB)	GREENLAND PUBLIC SCHOOL	2014-2016	9 CGPA	UTTAR-PRADESH

Certifications

- C for Everyone by [Coursera](#)
- 5G-architecture-design-protocols-evolution-deployment by [Udemy](#)
- 5G for Everyone by [Coursera](#)
- Linux Fundamental by [Coursera](#)
- Continuous Integration/Delivery by [Udemy](#)
- Jenkins by [Udemy](#)
- Ansible & Ansible-Playbooks for Automation by [Udemy](#)

Awards & Achievements

- **WOW Award (2025):** Recognized for deployments & integration of CBRS/NR-POS feature in Customer Setup.
- **Excellence Award (2024):** Recognized for developing C tools for **zero-touch server bring-up** and E2E test framework.
- **WOW Award (2023):** Recognized for exceptional client relationship management and consistently exceeding service-delivery expectations.
