

UPENDRA GUPTA

Software Engineer - C / C++ / Linux

Gurugram, India | +91 8423993232 | upendraguptaoffice@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer with **4 years of experience in C, C++, and Linux** systems development. Skilled in debugging, performance optimization, Linux system administration, shell scripting, and CI/CD automation (Git, Jenkins). Contributed to a large-scale 5G telecom network project, delivering production-grade features across US and European customer environments.

TECHNICAL SKILLS

Programming Languages: C, C++, CPP, Exception Handling, Lambda Expressions, STL, Shell Scripting (Bash).

Operating Systems: Linux (System Administration, Server Bring-ups), Ubuntu, Cron Jobs, Core Binding, Processor, Threads.

Debugging & Performance: GDB, Wireshark, Log Analysis, Root Cause Analysis, Performance Optimization, Core Dump Analysis

Tools & Practices: Git, Jenkins, Automation, Vim, Configuration Management, End to end deployment in production, AI Prompting.

PROFESSIONAL EXPERIENCE

Software Engineer | Capgemini (formerly Altran) | Gurugram, India | Aug 2022 - Present

- Collaborated with global cross-functional teams to design, integrate, and deliver C-based software, features, maintaining strict code quality and release standards.
- Debugged and resolved complex production issues, bugs, Jira tickets using GDB, Wireshark, and log analysis, improving system stability and reducing recurring defects.
- Delivered RAN software features for a 5G telecom network project, supporting successful rollout across customer environments in the US and Europe.
- Automated build, test, and deployment pipelines using Git and Jenkins on Linux, improving developer productivity by 30% and reducing manual intervention.
- Administered end-to-end Linux servers - OS installation, thread/core configuration, system bring-up, End to end deployment in production - improving performance and reliability.

PROJECTS

- Feature Integration & Test Automation:** Integrated and tested 5G-RAN software features end-to-end in C, reducing manual configuration effort and ensuring compliance with regulatory requirements.
- Zero-Touch Server Bring-Up:** Built an automated server bring-up and end-to-end test framework, cutting manual setup effort by 90%.

EDUCATION

B.E, CSE (Visvesvaraya Technological University, Bangalore, India)

(2018 - 2022), CGPA: 8/10

12th, PCM (AYT Sr. Sec School, Gorakhpur, India)

(2016 - 2018), CGPA: 8/10

10th, Science (Greenland Public School, Lucknow, India)

(2014 - 2016), CGPA: 9/10

CERTIFICATIONS

Modern C++ ([Udemy Link](#))

Complete C language ([Udemy Link](#))

Linux Mastery ([Udemy Link](#))

Bash Scripting ([Udemy Link](#))

Wireshark ([Udemy Link](#))

Prompt Engineering Master AI ([Udemy Link](#))

AWARDS

WOW Awards, Capgemini (2024, 2025 & 2026) - Recognized for ownership, professionalism, and consistent delivery in customer-facing engagements.
